

FINGERPRINTS

ENVIRONMENT POLICY

Fingerprints significant environmental aspects are:

- Selection of materials and components, packaging through module houses
- Production of wafers
- Cargo transports
- Packaging material

Fingerprint Cards works proactively and goal-oriented to minimize environmental impact. We continuously improve our environmental performance to prevent pollution.

This is achieved by:

- Integrating environmental considerations into our design process
- Selecting suppliers based on our requirements for environmental management
- Ensuring compliance with legal requirements
- Taking environmental impact into consideration when choosing means of transportation
- Enabling and encouraging virtual meetings
