

BIOMETRIC AUTOMOTIVE SOLUTIONS

ON THE ROAD TO THE FUTURE

FINGERPRINTS

BIOMETRIC TECHNOLOGY PUTS YOU IN THE DRIVER'S SEAT

There are millions of vehicles all over the world that would benefit from secure biometric authentication and identification. Letting a car, truck, bus or another vehicle know exactly who is driving or riding it, opens up an endless amount of opportunities.

The relationship between people and cars can be special and the choice of car often reflects our personality. By adding biometric solutions, you further increase the ability to customize your car and your way of driving. It becomes an extension of you.

In a workplace where different drivers on different shifts use the same vehicle, our biometric solutions could solve both driving comfort and attendance issues. Is the right person driving the right vehicle for the right amount of time? The applications and advantages of biometrics are endless. And wouldn't

it be great if all kids were identified when entering a school bus, sending a notification to the parents after arriving safely to school?

Introducing FPC ActiveRIS® and FPC Touchless platform now adds the possibility of having more than one biometric modality in a vehicle. In combination with Fingerprints' well-established FPC Touch Platform we can now offer secure and even more convenient multimodal biometric solutions for authentication and identification to the automotive industry.

PERSONALIZATION

Giving you the best drive that you ever had is closely connected to comfort and convenience. With a biometric solution the car knows exactly who's driving, and will adjust the settings to your preference. Letting your audio book or favorite playlist start where you left off, even after someone else has been driving the car.

PAYMENT

Stop searching for coins or your wallet when approaching the road tollbooth or the parking lot. A biometric solution makes these situations much faster, more convenient and a more secure.

INSURANCE

When signing an insurance policy for your car you can get a lower rate when you limit the use to one driver, a driver with a spotless "track record" or to drivers over a certain age. If the insurance company knows exactly who is driving a certain car the fees can be adapted and personalized.

SECURITY / MONITORING

We understand that trucking companies live by strict rules and regulations for how long a driver is allowed to drive before a break is needed. If the truck knows who is driving and by what rules the driver has to follow we add security to the roads.

ACCESS

Biometric technology will revolutionize the way the clients access rental or car pool vehicles. You restrict access, and set car functions and features depending on who's driving it. This can be particularly useful when your son or daughter want to borrow your car. Why not limit the maximum speed or cut down on the horsepower?

FEATURES THAT ADD EXTRAORDINARY VALUE

READY WHEN YOU ARE

Open with just a quick touch or look. Through the multimodal biometric technology features of FPC ONETOUCH® or FPC ONELOOK™ your vehicle instantly recognizes you.

NEVER LETS YOU DOWN

The FPC EVOTOUCH™ and FPC EVOLOOK™ add features that make your vehicle even smarter. Simply enroll once and you're ready. Every time you touch it or give it a look, it learns something new about you and evolves with you.

READY, STEADY, GO

FPC TOUCH'N'ROLL® and FPC LOOK'N'ROLL™ ensure you an easy setup and a smooth first-time user experience. You're in control right from the start.

BE SAFE EVERYWHERE

Anti-spoofing has never been better. The multimodal features FPC SAFETOUCH® and FPC SAFELOOK™ brings you an even higher level of security, far beyond PIN codes and passwords.

THE FASTEST UNLOCK YOU EVER MADE

With FPC QUICKTOUCH® it takes less than 0.1 seconds to verify your fingerprint and trigger activities.

YOUR TOUCH FROM ANY ANGLE

FPC 360TOUCH® allows the sensor to read and match your fingerprint from any angle with outstanding accuracy, precision and performance.
