

FINGERPRINTS

QUALITY POLICY

Fingerprint Cards develops cutting edge products within the field of biometric sensors with focus on the segments Mobile, Payment, and Access.

This enables us to provide both touchbased and touchless technology, secure physical and logical access as well as reliable authorizations for payments. We operate in a dynamic market and to meet and exceed customer requirements and expectations it is important to:

- Provide high quality products that meet performance demands
- Be agile, flexible and develop products fast
- Be a reliable and qualified supplier
- Recruit, develop and maintain world class expertise
- Create and be part of the ecosystem surrounding the product

All Fingerprint employees are committed to always performing their best. To ensure long term success we continuously improve our processes and procedures.

COMMUNICATION OF THE QUALITY POLICY

The quality policy should be available to relevant parties. In FPC this is done by posting the policy on the corporate web page. The QMS manager is responsible for making sure that whenever the Quality policy is updated, so is the web page.
