* Net debt was SEK 236.8 million (net cash: 103.8). Interest-bearing liabilities consist of a bond loan amounting to SEK 293.2 million and leasing liabilities for office premises amounting to SEK 15.0 million (16.8), reported according to IFRS 16.
The Board has resolved on a fully guaranteed SEK 300 million rights issue

- Fully guaranteed SEK 300m rights issue
- Set-off issue of B-shares to repay SEK 75m in outstanding hybrid equity instruments
- Subject to approval by the EGM on November 2, 2022
- The purpose is to improve Fingerprints’ working capital position and to cure a forecasted breach against the maintenance test covenant pursuant to the terms and conditions of the outstanding bond
What lies ahead?

**Near term predictions (6-12 months)**
- Effects of lock-down in China expected to decrease
- Potential gradual increase in demand (some lag effect)
- Inventory release – likely positive cash flow effect
- Leverage from OpEx cuts

**Long term predictions**
- Expected rebound in mobile demand
- Predicted growth in PC, Access & Payments
- Stronger visibility due to long order cycles

- The Covid-19 restrictions in China will eventually come to an end
- We foresee a return to the historical demand for mobile phones and continued growth in the PC, Access and Payments segments
- We have better visibility into the production cycle over the long term
- Cost savings program to reduce 20% of operating costs will have full effect Q4 2022
First devices launched with FPC1553

- First devices launched with FPC1553, our third-generation slim, side-mounted capacitive touch sensor
- Even smaller than its predecessors, supporting easier integration
- Introduction of a new foundry and second source supplier

Vivo Y77  Moto g32  Honor X40i
Entry into under-display market expands our addressable market

- First design win for FPC 1632 received last quarter from major Asian OEM, following successful qualification tests earlier this year
- Camera-based solution to capture fingerprint images through the OLED display
- Allowing users to unlock the phone, open an app, or authenticate a mobile payment by placing their finger directly on the display
- Expect first volume shipments in Q4 2022
Revenue streams are diversifying to new areas

* PC, Access, Payments as well as under-display sensors for Mobile
The Dynabook Satellite C30-K laptop is the first commercial product that integrates Fingerprints’ Match-on-Chip solution, which was added to Microsoft’s approved vendor list (AVL) for Windows Hello Enhanced Sign-in Security earlier this year.

Four out of the world’s six largest PC OEMs are already using our technology in their products.

We expect penetration of fingerprint sensors in computers to continue increasing.

Increased penetration of biometric solutions for Access & IoT

- Increased requirements on security and efficiency increases the penetration of biometric solutions for Access & IoT.
- Fingerprints is the global #1 fingerprint sensor supplier for the consumer IoT segment.
- Fingerprints’ technology in 100+ different access applications and devices.
- Increased interest in biometric access cards and security keys, now that the same key can be used to facilitate uniform, secure access to PCs and systems, as well as to physical spaces.

Biometric card deployments

- Bank of Cyprus: 1st contactless biometric payment card in the world with VISA
- areeba: 1st contactless biometric payment card in the Middle-East with VISA
- RBS NatWest: 1st contactless biometric payment card in the UK with VISA
- INTESA SANPAOLO: 1st contactless biometric payment card with
- BMCI: Commercial launch in Morocco, with VISA
- GROUPE BNP PARIBAS: Commercial launch in Morocco, with VISA
- VISA: 1st commercial launch in Europe, with VISA
- BNP PARIBAS: 1st larger commercial launch in France
- CA: 2nd commercial launch in France, and 1st with
- BBVA: 1st commercial launch in Mexico, with VISA
- JORDAN KUWAIT BANK: 1st commercial launch in MEA
- FINGERPRINTS: Commercial launch in Poland, with
Additional biometric card launches expected in Q4 2022

- Two more European banks are preparing commercial launches with Fingerprints’ technology, as well as two more banks in the Middle East
  - Total number of launches with Fingerprints’ technology expected to reach 12 during Q4
- Very good consumer feedback from recent launches
- Focus on simplifying the enrolment process, accelerating deployment
- Banks in Morocco will start to issue biometric cards to their premium customers automatically, at no extra cost
