

Fingerprint Cards AB (publ) receives first volume order for T-Shape™ sensors for use outside of the payments area

Fingerprint Cards AB (Fingerprints) has received an order of one hundred thousand T-Shape sensors for delivery this year, to be integrated in a product used for safe online access and secure offline data storage. With the form factor of a card, and featuring 2nd factor authentication, data and passwords are secured and authenticated using fingerprint biometrics.

"In February this year we announced our first significant order in the payment card area. We are pleased to see that our biometric technology is spreading to new card applications and to receive this first smartcard volume order outside of the payments area," says Thomas Rex, SVP Business Line Smartcards at Fingerprints.
