## Fingerprints and FEITIAN enter global software license and sensors volume agreement for biometric cards and access devices

Fingerprint Cards AB (Fingerprints™) and FEITIAN, a leading provider of online user authentication and payment transaction security of China, has entered a global license agreement for Fingerprints software platforms for payments and access, FPC-BEP, together with a volume agreement for FPC touch sensors. The agreement applies to both biometric cards and access devices such as physical access cards, and FIDO devices for logical access.

"We chose biometric technology from Fingerprints as they have the leading full system solution on the market and a proven cutting-edge biometric performance, which is of highest importance to both cards and access devices", says Yan Yan, Vice President at FEITIAN.

Feitian biometric card solution has been selected as an excellent innovation design for Beijing Winter Olympics 2022. The card integrates Fingerprints' touch sensor and biometric software.

"We are pleased to collaborate with FEITIAN and to see our superior biometric sensors and software continuing to gain new ground within the payments and access markets, as there is an increased demand for convenient, secure and trusted biometric solutions", says Michel Roig, SVP Business Line Payments & Access at Fingerprints.
