

Press release, Gothenburg
October 2, 2014

Fujitsu has launched a new smartphone and a new Android tablet embedding FPC1080 swipe sensor technology.

Fujitsu on the 30th of September announced two more products using FPC1080 swipe fingerprint technology, the Arrows NX F-02G smartphone and the Arrows Tab F-03G tablet.

Jörgen Lantto, acting President and Chief Executive Officer of FPC, comments:

“We are proud to see more and more products being launched in different parts of the world. These two new products from Fujitsu are the 31st and 32nd mobile devices successfully launched in the market with FPC fingerprint technology and they are further evidence of FPC’s world-leading position as technology supplier of capacitive fingerprint sensors with best image quality, performance and lowest power consumption.”

About Fingerprint Cards AB (publ)

Fingerprint Cards AB (FPC) markets, develops and produces biometric components and technologies that through the analysis and matching of an individual’s unique fingerprint verify the person’s identity. The technology consists of biometric sensors, processors, algorithms and modules that can be used separately or in combination with each other. The competitive advantages offered by the FPC’s technology include unique image quality,

extreme robustness, low power consumption and complete biometric systems. With these advantages and the ability to achieve extremely low manufacturing costs, the technology can be implemented in volume products such as smart cards and mobile phones, where extremely rigorous demands are placed on such characteristics. The company’s technology can also be used in IT and Internet security, access control, etc.

Fingerprint Cards AB (publ) discloses this information pursuant to the Swedish Securities Market Act (2007:528) and the Swedish Financial Instruments Trading Act (1991:980). The information was issued for publication on October 2, 2014 at 08.00 am CET.
